

cercon[®] zirconia

TIME TESTED • TIME TRUSTED

Longest Clinical History of Available Zirconias

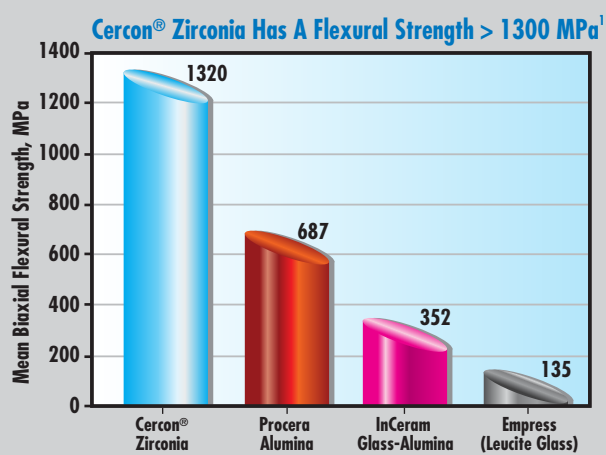

FROM THE FIRST research undertaken at the Engineering University in Zurich, Switzerland in 1996 and the first clinical studies in the industry at the Zurich Dental School in 1998, Cercon's zirconia has led the way in the all-ceramic revolution.

Now after 9 years of clinical success in more than 10 clinical trials, Cercon has proven to withstand the test of time which is why Cercon Zirconia frameworks now come with a 7 year guarantee against breakage.

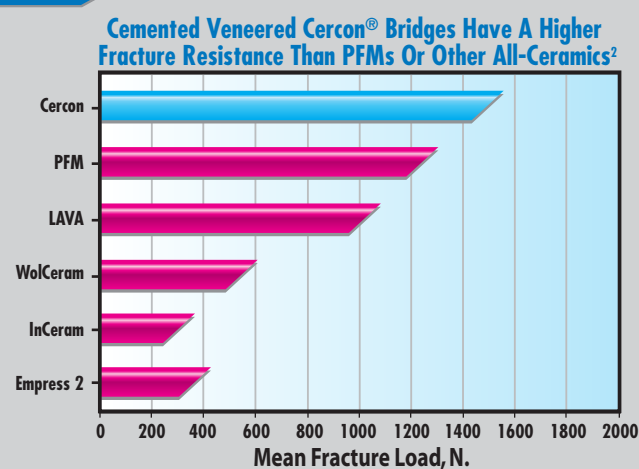

- 1996 • University of Zurich, Switzerland
- 1998 • University of Goettingen, Germany
- 1998 • Evident Study, Hanau Germany
- 2000 • Tokyo Medical & Dental University, Japan
- 2001 • University of Kiel, Germany
- 2001 • University of Wurzburg, Germany
- 2003 • University of Maryland, USA
- 2005 • University of Munich, Germany
- 2005 • University of Goettingen, Germany
- 2007 • CRA, Provo, Utah USA

Superior Strength

Medical grade Cercon[®] zirconia delivers strength and toughness beyond any other all-ceramic on the market, providing you with a durable solution in crown and bridge restorations.

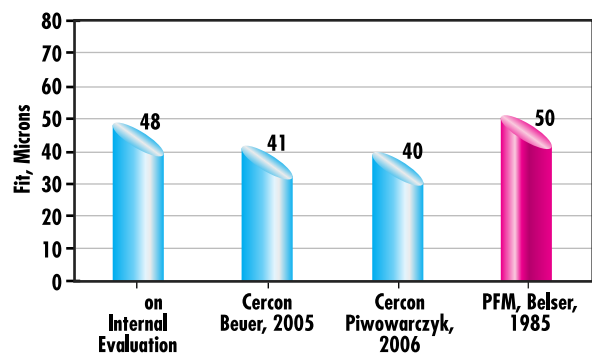

Performance Proven

I have been using Cercon Zirconia for over 5 years now and there is simply no better product when it comes to esthetics and strength.
Dr. David Little

- Longest Clinical History of Zirconias
- Over 1,300 MPa Flexural Strength
- Over 3 Million Units Placed
- Medical Grade – Tissue Friendly Biocompatibility
- Low Plaque Adhesion Characteristics
